BENEFITS

- **Easy to Install** - Modules designed for fast installation with 4 hook lift anchors embedded in each piece.
- **Codes** - Designed to meet AREMA standards and Cooper E-80 Loading plus 60% impact factor.
- **Radius Track** - Custom "pie-shaped" pieces to meet the curvature of the track.
- **Heavy Duty Port/Intermodal** - StarTrack HD Modules are the proven and preferred crossing of America's Largest Ports and Class I Intermodal Yards.
- **Fast Service** - Quick and easy project help by our national team with pricing and layouts.
- **Cost Savings** - Highly competitive installed and life-cycle costs.
- **Quality Control** - Manufactured to the rigid standards of the Oldcastle Precast quality control programs at our facilities nationwide.
- **In-House Engineering & Design** - Professional engineering staff and industry leading computer design software provide technical support and stamped drawings when required.
- **Class I Railroad Approved** - In service with Class I RR's and successfully tested on the Heavy Axle Load Loop (HAL) at the Transportation Technology Center in Pueblo, CO.
- **Reliability** - Over 150,000 track feet installed without a single structural failure.
- **On-Site Contractor Assistance** - Experienced StarTrack sales and service personnel available to support installations.
