

PRISON CELL MODULE - DORM

Configures with cell modules

PRISON CELLS

Our precast concrete correctional building system is designed and engineered to protect and extend the life of your facility. Our precast correctional cells offer unlimited layout choices. Projects that are highly complex and uniquely designed can be constructed on time and within budget.

USES

- > Federal, State and County Correctional Facilities
- > Private Facilities
- > Military Prisons
- > Juvenile Detention Facilities

ADVANTAGES

- Structural
- Cost efficient
- Speed of construction
- Product quality
- Resource management
- Life cycle/safety
- Security

BENEFITS

- Cells perform as structure
- Less labor, concrete stable building material
- Shorter build schedule
- Manufactured in a climate controlled plant
- Single source responsibility
- 100+ year durability/ less on site labor hours
- No joints or seams

For more information please contact our Modular Group at **(215) 257-2255** or send an email to opmg@oldcastle.com

PRISON CELL MODULE - DORM

Dormitory style modules allow for flexible bed space configuration options. Dormitory cells increase the holding capacity of the facility, allowing multiple inmates to be confined to a relatively small space.

Dorm modules include 4, 6 or 8 beds, wet and dry, cantilever balconies along with open and closed options. Privacy separation is included between the sleeping and toilet/sink areas.

Dorm modules can be mixed with other cell options to maximize structural use of modules. The precast cells are custom manufactured to your requirements. The precast cell building method is a fast track alternative solution to conventional construction.
