## **Oldcastle Precast Companies Collect Food for Local Food Banks**

TUCKER, Ga. (January 2018) –During the months of November and December, Oldcastle Precast companies in Tennessee, Kentucky and Candiac, Quebec sponsored food drives for local food banks. The food and hygiene products collected will help many families in need during the holiday season and after.

The food banks that received donations included Joseph’s Storehouse Food Ministry of Lebanon, Tenn. and La Corne d’Abondance of Candiac of Quebec.

Joseph’s Storehouse received essential hygiene products, canned and dried food goods from Oldcastle Precast Lebanon, TN and Lexington, KY employees who hosted the food drive.

According to Robert Billings, Joseph’s Storehouse warehouse supervisor, “People donate canned foods and hardly ever think about the hygiene, toiletry and dried goods, so this is a very welcome donation”.

“I am extremely proud of our team’s efforts in this worthwhile venture and very pleased to help out less fortunate families in our and surrounding communities.” stated Dave Terry, Site Manager over both locations. “It was a great way to end our year of community service events and we look forward to continuing the tradition in 2018”

Joseph’s Storehouse Food Ministry is a non-profit, faith-based food ministry distributing assistance to an average of 400-500 families per month in Wilson, Trousdale, Smith and DeKalb Counties of TN.

Oldcastle Enclosures donated non-perishable food to La Corne d’Abondance of Candiac who manages the Guignolée for the Candiac community. With the dream of putting food on the tables of the needy, employees collected food items during November and December for use during the holiday season and after.

Composed only of volunteers, the La Corne d’Abondance of Candiac runs a shop (thrift and various items) open to all, a food counter and a bazaar. Profits financially support families in need of Candiac.

*About Oldcastle Precast:* Oldcastle Precast is the clear choice for building products and services for North American infrastructure projects. We are a leading provider of engineered product solutions nationwide to a number of market sectors including Building, Water, Communications, Energy, and Transportation.
