

TANK CAR SPILL CONTAINMENT

For sites with tanker car spill containment requirements, we provide custom spill containment systems capable of holding over 33,000 gallons. Containment volume can be stored in line (between the rails) or directed offline and collected as designed in Spill Prevention, Control, and Countermeasure (SPCC) plans.

FEATURES

- Meets AREMA Standards and Cooper E-80 Loading
- Galvanized E-Clip Fasteners & Nylon Insulators
- Coating options per chemical application
- Chemical specific joint sealants
- Custom engineered
- Manufactured under factory-controlled conditions, resulting in a smooth, consistent finish

BENEFITS

- Engineered for industrial and structural compliance
- Rail access & standard industry fastener
- Long term durability, less maintenance
- Variety of industry standard solutions
- Size options per site conditions
- Less manpower needed on site, not exposed to the elements during production
