

Precast Concrete Pole Base

Durable Foundation

Convenient Installation

Superior Strength

Durable Solution
Swift Installation

Precast concrete pole bases are a convenient, durable foundation for lamp poles that save valuable time by eliminating the need for an on-site concrete pour. Our precast pole bases are available in a variety of depths and are engineered to meet minimum concrete strengths. Built-in conduit raceways make it easy to connect electrical components, and a variety of bolt patterns are available to secure the light pole in place.

Time-saving installation.

Our ready-to-use, precast pole bases streamline the installation process. Products arrive on-site ready to install, significantly reducing on-site labor and project time by eliminating the need for concrete pouring and tedious alignment adjustments. Our pre-engineered foundations simplify the placement and securing of lamp poles with an integrated conduit raceway core and built-in anchor bolts enabling a faster and more efficient deployment.

Features

- Precision positioned bolts
- Clean, smooth finish
- No concrete truck required
- Requires one electrician visit
- Average completion time of one day
- Manufactured in a controlled environment
- Available in a wide variety of standard and custom sizes and shapes
