

Precast Concrete Vault

Durable Construction

Multiple Dimensions

Versatile Applications

**High Quality
and Adaptable**

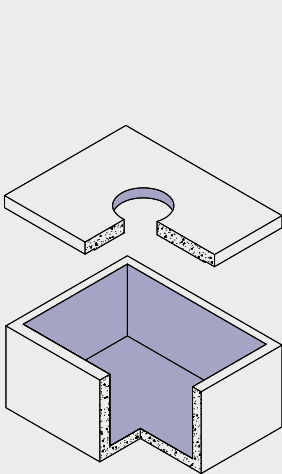

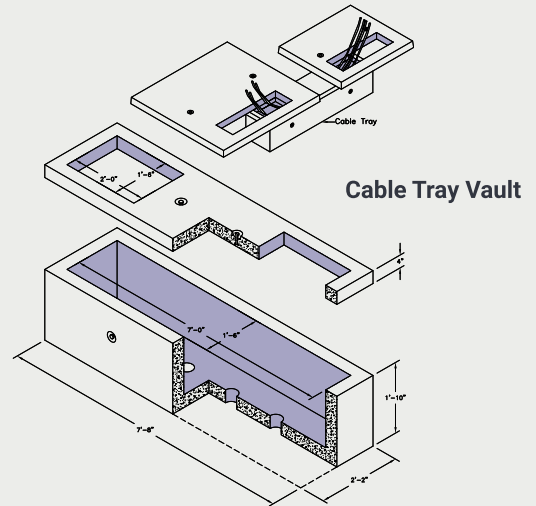

Oldcastle Infrastructure's precast concrete vaults come in multiple dimensions and are perfect for electrical, utilities, fiber-optic, and communications applications. Our vaults are available with a variety of standard options, including access doors, manhole covers, blockouts and knockouts, and can be customized to meet your application needs.

Dependable foundations.

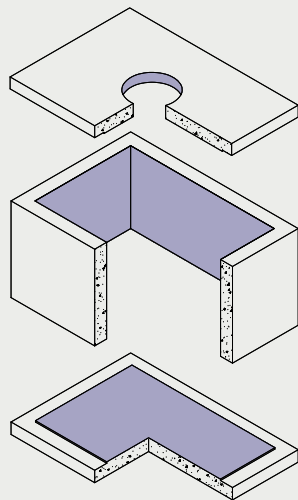

Our precast vaults are engineered for longevity and reliability, providing a solid foundation for various infrastructure needs. Each product is meticulously crafted using high-strength materials and advanced manufacturing techniques to ensure durability under even the most demanding conditions. Built to withstand environmental stresses and heavy loads, our vaults offer long-term stability and minimal maintenance, making them a dependable choice for your electrical, utility, and communication needs.
