

Carson[®]

Drop-N-Lock[™]

Tamper-Resistant

'Clicks' Into Place

Common Sizes

Effortless Protection

Click the lid closed and the Drop-N-Lock[™] system automatically engages. The discrete access point deters vandals and provides single-motion keyed disengagement with common tools, making authorized maintenance easy for technicians. The weather-resistant, stainless steel Drop-N-Lock mechanism is available on a variety of cover sizes and is perfect for new or retrofit applications.

Tamper resistant for effortless protection.

Drop-N-Lock™ lids provide effortless protection for underground components. The audible click ensures your components are safe as soon as you close the lid. Available for our Carson® line in a variety of standard sizes and colors for new or retrofit applications.
