

CARSON[®]

Drop-N-Lock[™]

TAMPER-RESISTANT

'CLICKS' INTO PLACE

COMMON SIZES

Effortless
PROTECTION

Click the lid closed and the Drop-N-Lock[™] system automatically engages. The discrete access point deters vandals and provides single-motion keyed disengagement with common tools, making authorized maintenance easy for technicians. The weather-resistant, stainless steel Drop-N-Lock[™] mechanism is available on a variety of cover sizes and is perfect for new or retrofit applications.

TAMPER RESISTANT

for effortless protection.

Drop-N-Lock™ lids provide effortless protection for underground components. The audible click ensures your components are safe as soon as you close the lid. Available for our Carson® line in a variety of standard sizes and colors for new or retrofit applications.

Dimensions may vary slightly.
