By using an advanced composite trench and cover system, Plastibeton® PED delivers a high performing trench system at a lower total install cost than any competition. The covers are designed, tested, and certified to be walked on without compromising safety and the lightweight composition and design makes it easy to install, remove or upgrade.

Product Available Q1 2020
As a leader in composite products and manufacturing, Oldcastle Infrastructure has the advantage of low tooling costs and existing product families and manufacturing processes. In combination with a fast installation process requiring far fewer truckloads, Plastibeton® PED provides a lower total cost than any competition—most importantly, without compromising on quality, functionality and durability.
