

THERMO PACK

NEW OR RETROFIT

FREEZE PROTECTION

MULTIPLE SIZES

INSULATE
and protect.

Insert the closed-cell foam insulating pads into meter pits to protect water meter access lines from freezing. Thermo Pack freeze protection system provides a layer of insulation to protect underground water meter lines by keeping the geothermal heat below ground. The removable center ring provides easy access to water meters and ensures heat retention in the pit by reducing the amount of heat released.

FREEZE PROTECTION

where you need it most.

The removable inner ring provides
minimizes heat loss during service

Can be used in new
or existing meter pits

Thermo Pack fits both
Carson® *Heavywall* meter pits and
Carson® *NexGen* meter pits.

Dimensions may vary slightly.
