

All new residential meter pit system

Cover

Universally-accepted 12" diameter cover is available in recessed or overlapping designs. The non-ferrous cover has AMR options, accessories, and locking features.

Ring

Lightweight and suitable for new or retrofit installations, the ring is completely non-ferrous, eliminating frequency interference and ready for the AMR/AMI solutions of the future.

Meter Pit

Our new, high-strength meter pits are engineered to exceed 20,000 lb. vertical load. The fluted-wall design is lightweight, nestable, and easily modifiable.

WHY CARSON[®] NexGen?

We future-proof North America's infrastructure by protecting the resources and enhancing the systems that strengthen your communities. Our Carson[®] NexGen residential meter pit system is attractively priced and designed specifically for the larger and more intelligent meters of the future. A line of products prepared for the AMR/AMI advances to come—easy to order, easy to ship, and easy to manage for our distributors, specifiers, and installers.

PRODUCT BENEFITS

MADE IN THE USA

Carson® NexGen components are attractively priced as a unit so you can up-size now and be ready for what comes next.

Carson® NexGen Cover:

A lightweight, durable design with undermount or AMR recess options that match leading manufacturer specifications. Universal fit interfaces with current market rings for retrofit installations.

Carson® NexGen Ring:

A revolutionary new ring made of high-strength, non-ferrous material for interference-free meter reads. Replace your cast iron rings now and be ready for the next generation of meters.

Carson® NexGen Meter Pit:

We've maximized available meter space to prepare for the larger, more intelligent meters of the future. Our new, all-white fluted-wall design is easily modified with standard power tools. Meter pits nest to minimize the product footprint for the best value on shipping costs and inventory storage space.
