

# TERRAMOD™

Simple. Local.  
Green Solution.

| Modular Bioretention System

# SIMPLIFIED

## bioretention system

---

**CREATED TO STREAMLINE AND ENHANCE BIORETENTION APPLICATIONS,**

TerraMod™ offers top tier filter performance for urban stormwater management systems. Focused on providing a green, localized and simple solution, TerraMod's modular design allows you to meet local bioretention specifications. Due to the flexibility and variety of usage, TerraMod expedites design and installation through prefabrication and minimal onsite assembly.

Learn more about TerraMod and what makes it the ideal system for your application at [oldcastleinfrastructure.com/brands/terramod](https://oldcastleinfrastructure.com/brands/terramod)

### GREEN INFRASTRUCTURE

TerraMod is a green stormwater management solution, created to meet your application's LID goals.

### MODULAR DESIGN

Designers have the flexibility to incorporate TerraMod modules in almost any configuration.

### EASY INSTALLATION

System components arrive ready with minimal assembly required at the jobsite for faster, safer installation by leveraging simple yet strong design features such as tongue-and-groove joints.

### OPTIONAL MODULES

Available modules offer integrated trash capture and bypass.

### LOCALLY PRE-FABRICATED

TerraMod systems are produced in our local facilities to meet quality standards.

### EQUIVALENCY APPROVED

Granted "functional equivalency" by Washington State Department of Ecology, TerraMod may be designed using the same standards as any non-proprietary bioretention planter box.

## SIZING INFO

#### Available Widths (FT):

- | 3.5'                    | 6'
- | 4'                        | 7'
- | 5'

#### Available Depths (FT):

- | 3'
- | 5'

#### Available Lengths (FT):

- | 10'

Sizes listed are standard. Custom sizes are available. Contact a sales representative for more information.
