### CARSON®

A NAME YOU TRUST. DURABILITY YOU EXPECT.

Carson® high-density polyethylene (HDPE) enclosures deliver reliable, chemical and water resistant performance and install with ease. The Carson® brand offers a wide variety of sizes and is preferred and specified by industry professionals nationwide. You can depend on the trusted Carson® brand, delivering reliable hand holes, valve boxes, meter boxes and vaults for nearly 50 years.

### CHRISTY®

RELIABLE AND COST-EFFECTIVE.

Christy® concrete enclosures deliver reliable, cost-effective performance. The Christy® brand offers a wide variety of sizes making it the preferred choice for many applications. You can depend on the trusted Christy® brand, delivering reliable hand holes, valve boxes, meter boxes and vaults to the utility market for over 40 years.

### FIBRELYTE®

STRONG AND EASY TO HANDLE.

Fibrelyte® manufactured from an exclusive composite formulation of polyester resin, fiberglass and calcium carbonate yields lightweight, high strength enclosures. This proprietary composite material is stronger, easier to handle and much lighter than concrete, saving both time and money during installation, service work and transportation.

## OLDCASTLE FRP

STRENGTH AND DURABILITY, CAREFULLY CRAFTED.

The Oldcastle FRP family of enclosures are produced in a unique hybrid process bonding strong, polymer concrete rings with high-impact resistant fiberglass sidewalls, forming a monolithic body. Paired with polymer concrete lid, select units are suitable for light or heavy incidental traffic. Specifiers can meet expected load ratings while installers can handle and modify with ease.

## DURALITE™

SURPRISINGLY LIGHT. EXCEPTIONALLY STRONG.

The performance you need – the ease of installation you love. The Duralite™ family of enclosure deliver unexpected Tier 15 load rating performance in the lightweight enclosure category. Engineered to withstand heavy loads, Duralite™ intelligently blends composite materials to provide durable, accessible security to our necessary infrastructure.

## OLDCASTLE POLYMER (formerly H-Series™)

DURABILITY DELIVERED THROUGH INNOVATION.

Oldcastle Polymer enclosures deliver strength and durability like traditional concrete, but at a fraction of the weight. The Oldcastle Polymer brand offers a broad range of sizes and configurations to meet your needs. These enclosures provide medium to heavy duty solutions for vaults, splice boxes and meter boxes ideal for any industry—municipal water, telecommunications, and other commercial and industrial applications.

# Selecting the Right Product and Accessories

---

## Choose your Size and Brand

A wide variety of sizes are offered in round, square, and rectangular configurations. Choose the size and brand that best fits your need.

## Know Your Required Performance Level

Our bodies and lids are rated for performance. Look for the load rating that matches your project application.

## Select a Lid Style and Marking

Lids are available in a variety of materials and colors. Some are available with specialty markings, marking plates, and special locking options.

## Choose Accessories, Hardware, and Other Options

Hardware & other additional items can be found for our enclosures in the back of this booklet.

---

## Product Availability

Oldcastle Infrastructure divides products into two availability groups: Quick Ship and Made to Order.

The Oldcastle Infrastructure Quick Ship Program is designed to provide customers with some of our most popular items quickly, supporting projects with tight schedules. Our Quick Ship items can be easily identified in this document by locating the items with this truck  next to them. Items that are identified as Quick Ship will be shipped from an Oldcastle facility within 3 business days.

Made to Order items are identified as all items that do not have the Quick Ship icon next to them. The lead time for these items can be obtained by reaching out to our customer service team.

## Additional Information

For more detailed information on a product, see the individual specification sheet located in the Oldcastle Infrastructure Catalog Binder or online at [oldcastleinfrastructure.com](http://oldcastleinfrastructure.com).

## Terms and Conditions

Terms and conditions are located on our website at: [oldcastleinfrastructure.com/support/terms-conditions/](http://oldcastleinfrastructure.com/support/terms-conditions/)

# Load Ratings

## LOAD RATING : LIGHT DUTY - PEDESTRIAN / GREENBELT APPLICATIONS

CLASS VEHICLE	GVW (LB)	MAX WHEEL LOAD (LB)	DESIGN LOAD (LB)	TEST LOAD (LB)	SPECIFICATION	LOAD CATEGORY
Pedestrian	-	-	300 (PSF)	-	ASTM C 857	A-0.3
			-	3000	ANSI/SCTE 77	Light Duty, Pedestrian
			850	2200	Telcordia GR-902	Greenway
Passenger Vehicle	6000	2400	2000	4340	WUC, Guide 3.6	Pedestrian Greenway

## LOAD RATING : MEDIUM DUTY - ANSI/SCTE TIER 5, 8 AND 15

CLASS VEHICLE	GVW (LB)	MAX WHEEL LOAD (LB)	DESIGN LOAD (LB)	TEST LOAD (LB)	SPECIFICATION	LOAD CATEGORY
Light Duty Truck up to Class 3	1400	5600	3900	1040	ANSI/SCTE 77 Telcordia GR-902	Pedestrian/Light Duty Incidental
			5000	7500		Tier 5
			8000	12000		Tier 8
Medium Duty Truck up to Class 5	19500	7800	7800	20800	Telcordia GR-902	Non-Continuous Traffic
			8000	17360	ASTM C 857	A-8
			8000	17360	WUC, Guide 3.6	Non-Continuous Traffic
Medium Duty Truck up to Class 7	33000	13200	15000	22500	ANSI/SCTE 77	Tier 15

## LOAD RATING : HEAVY DUTY - ANSI/SCTE TIER 22

CLASS VEHICLE	GVW (LB)	MAX WHEEL LOAD (LB)	DESIGN LOAD (LB)	TEST LOAD (LB)	SPECIFICATION	LOAD CATEGORY
Heavy Duty Truck up to Class 8	40000	16000	16000	16000	WUC, Guide 3.6	In shoulder or parking area outside traffic lane
			16000	34720	ASTM C 857	A-16
			22500	33750	ANSI/SCTE 77	Tier 22

## LOAD RATING : TRAFFIC RATED - AASHTO H20\*

CLASS VEHICLE	GVW (LB)	MAX WHEEL LOAD (LB)	DESIGN LOAD (LB)	TEST LOAD (LB)	SPECIFICATION	LOAD CATEGORY
Vehicles up to Class 8	40000	16000	16000	34720	ASTM C 857	A-16

\*Units must include a steel frame and steel cover.

## Load ratings are determined by the lowest component rating

The Rural Utility Service (RUS) is a department of the US Department of Agriculture organized to facilitate rural developments. You will find Oldcastle Infrastructure enclosures listed by the RUS. Please reference brand specific product data sheets for additional clarifications. All Oldcastle Infrastructure enclosures conform to the RUS "Tamper Resistant" fastener design for buried pedestals found listed by code and group.

The "Test Load" term is used in ANSI/SCTE 77-2010 to designate the minimum load that an enclosure must be able to sustain to qualify for a particular performance rating. The term is synonymous with (minimum) Failure Load. It should be noted that within the ANSI/SCTE 77-2010 specification, the "Test Load" is 1.5 x the Design Load. Some specification and operating companies select a higher multiple or safety factor for proof of Design Load.

KEY: Extension Unit (Stacked Body Unit)

\*Models can be increased by 6" to desired height.

# Lid Markings and Materials

## STANDARD MARKINGS

Lids are available with standard markings:

- Blank/No Mark
- Communication
- Telephone
- CATV
- Fiber Optics

## MARKING PLATE

4" x 8" Plate

Standard markings include two lines of one inch text with a max of thirteen characters per line.

Custom markings are available.

Contact Customer Service for detailed information.

## HDPE

## CONCRETE

## COMPOSITE

## POLYMER

## STEEL

# Security, Hardware and Accessories

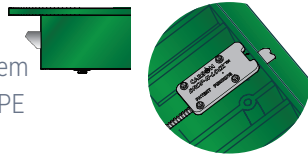

Enclosures come equipped with standard lid fastening hardware (varies per box type). Standard assembly is shown below.

**🔒** STANDARD HEX HEAD:  
3/8 - 1/2 Stainless Steel Hex Head Bolt with Washer

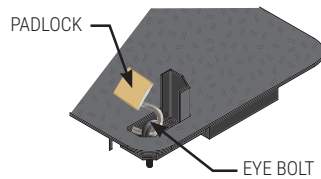

**🔒🔒** DROP-N-LOCK™:  
Automatic locking system (available on select HDPE covers only)

**🔒🔒** STANDARD PENTA HEAD:  
3/8 - 1/2 Stainless Penta Head Bolt with Washer

**🔒🔒🔒** PADLOCK & EYE:  
Eye bolt and padlock (available on steel covers only)

**🔒🔒🔒** VANDAL PROOF:  
Oldcastle Enclosures Vandal Proof bolt with specialty key.

- A. Rack Mount
- B. Cable Racks/ Cable Arms
- C. Unistrut
- D. Pulling Eye - 1,000 lb. and 3,000 lb
- E. Electronic Marker
- F. Ground Buss
- G. Mouseholes / Circular Holes
- H. Dividers
- I. Lifting Tool
- J. Solid Bottom (not shown)  
(Oldcastle Polymer)
- K. Gaskets (not shown)
- L. Spanner Screwdriver

Security Level	Typical Tool
🔒 Low	Fingers, Car Key, Pen Knife
🔒🔒 Medium	Screwdriver, Hammer, Hacksaw, Pliers
🔒🔒🔒 High	Power Tools, Crowbar, Wedge, Hammer
🔒🔒🔒🔒 Extreme	Sledge Hammer, Disc Grinder, Bolt Cutter

# UNDERGROUND ENCLOSURES

## Installation Guide

**WARNING:** All installations must be performed by qualified personnel with proper safety equipment. When installing any surface-level underground enclosures installers must follow all national and local electrical, safety and building codes.

### PEDESTRIAN / GREENBELT Installations and Applications

Typical installations are pedestrian and greenbelt spaces and other non-deliberate traffic locations.

#### LOAD RATING:

- LIGHT DUTY | Pedestrian | Design Load: 300 PSF
- MEDIUM DUTY | ANSI/SCTE Tier 8 | Design Load: 8,000 lb

#### ENCLOSURE BRANDS:

- Carson®
- Christy®
- Fibrelyte®

### GREENBELT, SIDEWALK & RIGHT OF WAY Installations and Applications

Typical installations are greenbelt spaces, sidewalks and right of ways and other incidental non-deliberate traffic locations.

#### LOAD RATING:

- MEDIUM DUTY | ANSI/SCTE Tier 15 | Design Load: 15,000 lb
- HEAVY DUTY | ANSI/SCTE Tier 22 | Design Load: 22,500 lb

#### ENCLOSURE BRANDS:

- Duralite™
- Oldcastle FRP
- Oldcastle Polymer

### ROADWAYS AND DELIBERATE TRAFFIC AREAS Installations and Applications

Typical installations are roadways and deliberate traffic areas. Traffic rated products require a steel frame and cover with a concrete collar.

#### LOAD RATING:

- TRAFFIC RATED | AASHTO H20 | Design Load: 16,000 lb

#### ENCLOSURE BRANDS:

- Christy®

Always ensure the product load rating matches the anticipated load rating of the application.

# UNDERGROUND ENCLOSURES

## Installation Guide

### INSTALLATION NOTES

■ LIGHT DUTY   ■ MEDIUM DUTY   ■ HEAVY DUTY   ■ TRAFFIC RATED

#### INSTALLATIONS ON A SLOPE OR HILLSIDE:

Enclosures installed on a slope or hillside should be installed level and have a retaining wall built to hold the soil to prevent erosion above the enclosure.

#### SIDEWALKS:

If the installation is to be within a sidewalk, it is generally more practical to use a masonry saw and remove the entire sidewalk width to facilitate proper soil removal.

#### BASE (CRUSHED STONE):

A base of 6" - 8" is recommended in high water table areas. A deeper layer of crushed stone may reduce the chances of settling over time. 2" to 4" of stone may be used in areas with high soil stability.

#### LIFTING:

Enclosures can be safely handled by hand by the proper number of trained workers or with proper lifting equipment. Always follow guidelines for safe lifting.

#### BRACING:

Install bracing within the enclosure to protect the sides from bowing during backfilling. Suitable bracing could be one or multiple wooden 2x4's cut to length and installed snug against the inside walls of the enclosure.

#### BACKFILL:

Be sure to remove any stones 3" or larger from the backfill material. An alternate 'dry lean mix' may be prepared for backfill using Portland cement and crushed rock in a ratio of 1:10. This higher strength alternative is useful where known traffic is anticipated within the vicinity of the enclosure that could cause vehicular surcharge loading.

#### TAMPING:

It is recommended not to use mechanical tamping tools such as a tamping ram or plate compactor when tamping the backfill material around the enclosure to prevent bowing to sides of the enclosure. Mechanical compactors can increase the soil density by as much as 200%. DO NOT use heavy equipment, like backhoes, for tamping as damage will occur.

**Always ensure the product load rating matches the anticipated load rating of the application.**

Page 2

# UNDERGROUND ENCLOSURES

## Installation Guide

### PEDESTRIAN RATED / GREENBELT APPLICATIONS

■ LIGHT DUTY | Pedestrian | Design Load: 300 PSF

■ MEDIUM DUTY | ANSI/SCTE Tier 8 | Design Load: 8,000 lb

#### I. EXCAVATION

Excavate an area approximately 12" to 16" longer and wider and 6" to 8" deeper than the actual dimensions of the enclosure to be installed. The excavation floor should be flat and level.

#### II. INSTALLATION

1. Add a 6" to 8" deep base of  $\frac{3}{4}$ " and smaller, crushed stone to the excavated hole. The base material shall be crushed, angular stone, not 'river rock or round stone,' and should be free of soil and organic material (see page 2, "Base"). Use a mechanical or hand tamper to tamp down the crushed stone to be flat and level.
2. Set the enclosure box into the excavated hole. Adjust the height to grade. Be sure the enclosure is level, centered in the hole, and is parallel with the sidewalk or curb if applicable.
3. Install bracing (see page 2, "Bracing"), then install the cover and bolts to prevent debris from entering the enclosure and help maintain box rigidity during the backfilling procedure.
4. Utilize the excavated material to backfill along the open, outer sides of the excavated hole (see page 2, "Backfill").
5. Tamp the soil around the enclosure with hand tamping tools\*. Soil in the immediate vicinity should be tamped and sloped away from the enclosure. Be sure not to slope the grade towards the enclosure as debris could make the cover difficult to remove.
6. Remove the internal bracing and replace the cover and bolts to complete the installation.

\* DO NOT use heavy equipment, like backhoes, for tamping as damage will occur (see page 2, "Tamping").

**Always ensure the product load rating matches the anticipated load rating of the application.**

Page 3

# UNDERGROUND ENCLOSURES

## Installation Guide

### TIER 15 & TIER 22 RATED / GREENBELT, SIDEWALK & RIGHT OF WAY APPLICATIONS

● MEDIUM DUTY | ANSI/SCTE Tier 15 | Design Load: 15,000 lb    ● HEAVY DUTY | ANSI/SCTE Tier 22 | Design Load: 22,500 lb

### I. EXCAVATION

Excavate an area approximately 12" to 16" longer and wider and 6" to 8" deeper than the actual dimensions of the enclosure to be installed (see page 2, "Sidewalk"). The excavation floor should be flat and level.

### II. INSTALLATION

1. Add a 6" to 8" deep base of  $\frac{3}{4}$ " and smaller, crushed stone to the excavated hole. The base material shall be crushed, angular stone, not 'river rock or round stone,' and should be free of soil and organic material (see page 2, "Base"). Use a mechanical or hand tamper to tamp down the crushed stone to be flat and level.
2. Set the enclosure box into the excavated hole (see page 2, "Lifting"). Adjust the height to grade. Be sure the enclosure is level, centered in the hole, and is parallel with the sidewalk or curb if applicable.
3. Install bracing (see page 2, "Bracing"), then install the cover and bolts to prevent debris from entering the enclosure and help maintain box rigidity during the backfilling procedure.
4. Backfill along the open, outer sides of the excavated hole (see page 2, "Backfill").
5. Tamp the soil around the enclosure with hand tamping tools\*. Soil in the immediate vicinity should be tamped and sloped away from the enclosure. Be sure not to slope the grade towards the enclosure as debris could make the cover difficult to remove.
6. Remove the internal bracing and replace the cover and bolts to complete the installation.

\* DO NOT use heavy equipment, like backhoes, for tamping as damage will occur (see page 2, "Tamping").

**Always ensure the product load rating matches the anticipated load rating of the application.**

## Installation Guide

### H2O RATED / TRAFFIC APPLICATIONS

■ TRAFFIC RATED | AASHTO H20 | Design Load: 16,000 lb

### I. EXCAVATION

Excavate an area approximately 12" to 16" longer and wider and 6" to 8" deeper than the actual dimensions of the enclosure to be installed (see page 2, "Sidewalk"). The excavation floor should be flat and level.

### II. INSTALLATION

1. Add a 6" to 8" deep base of  $\frac{3}{4}$ " and smaller, crushed stone to the excavated hole. The base material shall be crushed, angular stone, not 'river rock or round stone,' and should be free of soil and organic material (see page 2, "Base"). Use a mechanical or hand tamper to tamp down the crushed stone to be flat and level.
2. Set the enclosure box into the excavated hole (see page 2, "Lifting"). Adjust the height to grade. Be sure the enclosure is level, centered in the hole, and is parallel with the sidewalk or curb if applicable. Install the cover and bolts to prevent debris from entering the enclosure during the backfilling procedure.
3. Backfill along the open, outer sides of the excavated hole (see page 2, "Backfill").
4. The final 6" to 8" of the excavation should be finished with a concrete collar. This is accomplished by providing a form around the enclosure that would produce a six-inch minimum wide collar. The concrete collar mix used in the installation shall exceed a minimum of 3,000 PSI compressive strength.
5. Secure the cover and bolts to complete the installation.

**Always ensure the product load rating matches the anticipated load rating of the application.**

### Installation Methods

#### 2x8

- Adhesive

#### 4x8

- Adhesive
- Bolt Down
- Adhesive + Bolt Down

### Required Items

- Cover
- Marking Plate
- Equipment and Materials for Your Install Method
- Compressed Air for Debris Removal

### Equipment and Materials

#### Adhesive Installation

- Latex/Silicone Gloves
- Caulk Gun
- Adhesive: Seamer Mate or Geocel 2320 ONLY
- 3-5 lb weight
- Safety Glasses
- Clean rags
- Cleaner: Xylene/Acetone/Mineral Spirits

#### Bolt Down Installation

- Spanner Bit Head Screwdriver
- (2) 10-24 x 1/2 Flat Head Spanner Bolts

## PREPARATION AND INSTALLATION

For optimal results, cover and marking plate should be clean and dry. If possible, allow the parts to come to the same temperature. Room temperature is preferred but not absolutely necessary. Remove any large foreign debris from the cover (i.e., dust, water, ice, mud) and allow it to dry before installation. Use clean rags to wipe the recessed area with cleaner and use compressed air to remove any small remaining debris.

### Adhesive Installation

1. Apply a moderate amount of adhesive to the back of the marking plate in a 1/8" bead so that it runs the full length of the plate at an equal distance from the edge and between each bead (2"x8") or in a wave-like pattern with a border (4"x8"). Using excessive adhesive will slow curing process. (Figure 1)
2. Set the marking plate in the recessed area evenly, and apply pressure to the top of the plate with your hand to ensure that it is set firmly into the recessed area. Ensure it is below or flush with the cover surface before adhesive sets. (Figure 2)
3. Wipe any excess adhesive off using a rag and cleaner. Apply a 3-5 lb. weight and let it sit for 30 minutes to ensure that the adhesive sets to form a permanent bond.

## Installation Guide

Figure 1

Figure 2

### Bolt Down Installation

1. Using the spanner bit, hand-tighten the two spanner bolts into the pre-drilled holes of the marking plate (Figure 3) securing it to the cover.
2. If adhesive is used, apply continual pressure to the top of the marking plate for 10 seconds. Tack-free time is 10-20 minutes and full cure is approximately 24 hours.
