

TRUFIREWALLS™

Built to take the heat.

SAFEGUARDING

valuable assets.

WE ARE COMMITTED to providing our customers with the most effective high temperature and long duration fire containment walls on the market. TruFireWalls™ exceed industry standards and construction codes in order to protect the critical assets that keep your business running strong.

We provide utility owners with a proven solution and peace of mind.

4-HOUR FIRE RATING

TruFireWalls™ have surpassed both the required 4-hour fire exposure test and the 45 psi water jet blast test at 1,960° F.

CERTIFIED PROTECTION

TruFireWalls™ are certified by Southwest Research Institute per ASTM E-119 and compliant with IEEE Std 979 and IBC construction codes.

IMPACT RESISTANT

Meets UL standard 752 Level 3 rating. TruFireWalls™ survive shrapnel impingement and can withstand a 44 Magnum ballistic projectile with no through penetration.

QUICK AND SIMPLE INSTALLATION

TruFireWalls™ are built from prefabricated, grooved columns and slide-in panels and are installed with standard tools. Construct one wall in one day or less.

LIGHTWEIGHT PANELS

QUICK ASSEMBLY

EASY TO INSTALL

UNIQUE REFRACTORY CEMENT DESIGN

BALLISTIC IMPACT RESISTANT, LEVEL 3

REMOVABLE PANELS FOR EASY REPAIR

ADAPTABLE FOR ANY SITE LAYOUT
