

# PROtrough

 **Oldcastle Infrastructure**<sup>TM</sup>  
A CRH COMPANY

**Cable Protection  
Systems**

## Innovative system **saves time and cost.**

Easily resolve engineering challenges with PROtrough, a lightweight and easy-to-deploy trench system that excels where easily deployed and accessible cable management systems are required. Components are suitable for single person lift, resulting in considerable project time and cost savings. This modern alternative to traditional concrete trench for rail, light rail and power markets is highly durable, fire retardant, and integrates seamlessly with STAKKAbox™ access vault systems and MULTIduct™ cable protection systems for a complete solution with an extensive range of accessories to enable flexibility and ease of access.

**Built to protect our infrastructure systems.**

### Lightweight

5 times lighter than concrete. Components are less than 50 lbs and suitable for single person lift and install.

### Quick Assembly

A unique, one-click connection system with a slide-and-drop connectivity and interlocking cover.

### Accessories

An extensive range of accessories to provide solutions for tight turns, elevations, natural curvature and other obstacles.

### Strong & Durable

Designed with optimum sidewall performance for minimal flex when backfilled. Fire retardant and chemical resistant.

### Options

Custom markings, security bolts and divider panels are available.

### Superior Performance

Eliminates common heat distortion and thermal expansion issues.
