

Carson[®] HeavywallTM

**Heavy Performance
and Lightweight**

Best in class **lateral load rating.**

Carson® Heavywall™ BCF meter boxes are engineered to exceed 20,000 lb. vertical load (20K); outperforming the lateral load rating of any plastic box on the market today. Easily modifiable and lightweight with high-strength durability. Extra-wide shoulders beneath the lid seat and an expanded anti-settling flange to prevent sinking in soft soil conditions make Carson Heavywall BCF an ideal solution for municipalities everywhere.

We provide the right fit for your needs because we engineer our products with you in mind.

Lightweight Design

A lightweight design for ease of handling and installation. Many boxes can be handled by just one person per OSHA guidelines.

Strength & Durability

High-strength durability without the chipping, cracking, or weight of traditional concrete.

Easily Modifiable

Easily modified in the field with 18V power tools.

Variety

Available in a variety of sizes and depths with a complete line of accessories and, extensions in both flat and grade-leveling orientations.

Model	Size (LxW)	Shape	Depths
