

Plastibeton®

Cable Trench

Lightweight Design

High-Strength

**Trusted
Performance**

Plastibeton® cable trench contains, protects and allows easy access to power, control, signal, communication, and fiber optic cables. Made of a unique, patented High-Density Polymer Concrete, the Plastibeton cable trench system offers flexibility, strength, and exceptional resistance to freeze/thaw conditions. It exceeds industry standards with an unmatched strength-to-weight ratio, allowing safe, long-term cable access and reduced installation and maintenance costs.

Advanced composite design.

Monolithic construction provides simplified installation, superior strength and exceptional durability.

Covers lay flush within the trench for safe walking or driving transition.

Cable exits in trench bottoms allow for drainage and interface with conduits.
