

# Carson<sup>®</sup>

## 1419 Hinged Cover

Easy Access

Flush & T-Cover

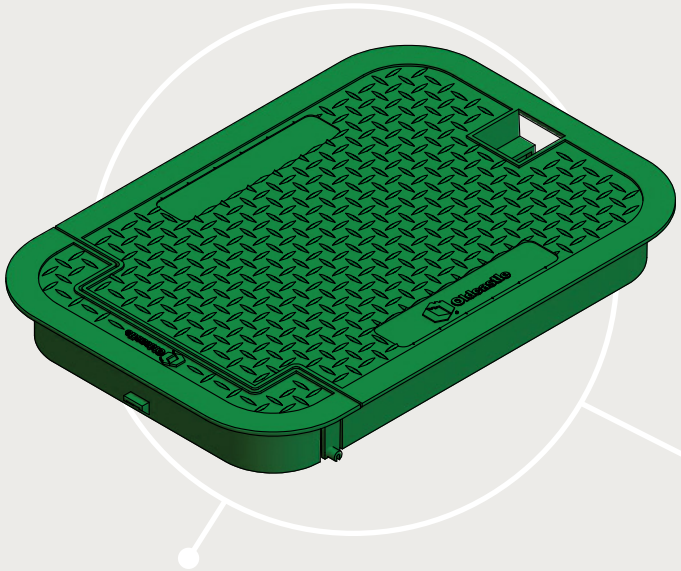

Customizable

**Covered  
and Secured**

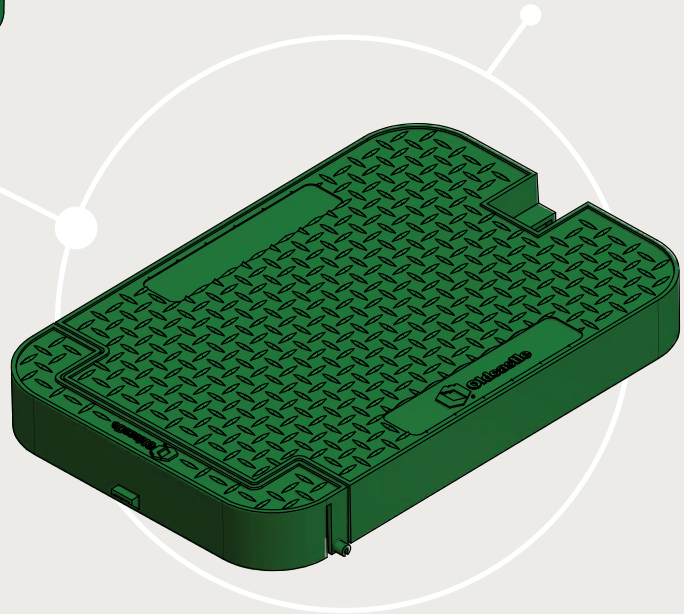

Carson<sup>®</sup> 1419 hinged covers provide easy access to your utility meter or valve without tools and without having to remove the whole cover. The cover is uniquely built into the body of the enclosure. With this new cover option, there's no more need to replace lids that float away or that get lost due to weather conditions.

# Know you're covered, even in harsh weather.

Hinged covers stay securely in place and flip open to 105° for easy access.

The cover and body interlock at the hinge and sidewalls.

Hinged covers are easy to install and available in both Flush and T-Cover styles for our Carson® 1419 boxes. This cover stays in place and provides easy access without tools.
