

Transformer / Meter

Combination Pad

Integrated Solution

Compact

Easy Installation

**Integrated
Power Platform**

The CBP Combo Box Pad and Metering Pedestal delivers a compact, integrated solution for single-phase transformer and metering applications. Its buried pad design streamlines cable routing and protects conductors below grade, while the extension supports up to two meters and multiple connector ports—reducing installation complexity and enhancing underground system reliability.

Designed with the input of line personnel.

Features and Benefits

- Install your transformer and meter enclosures on the CBP-37-43-15A with a 22" x 24" top opening x 15" high or the CBP-37-43-24A transformer box pad with a 22" x 24" top opening x 24" high.
- Light weight, yet built strong and durable for single phase transformers from 25 kVA up to 167 kVA.
- The box pad's extension accommodates one MPP-141455-MG-X meter pedestal. (Assembly is required.)
- Optional two AB-2 brackets available for holding down transformers.
- Three optional six port 350 MCM connectors (L6350), are available from factory for mounting in the meter pedestal.
- Option to go from a L6350 6 way connector to a L6600 6 way connector.
- The box pad's open underneath interior cavity provides a raceway between the single phase transformer and the meter pedestal.
- The 15" or 24" high box pads are constructed for time saving installations, no forms to make, just dig the hole, fill with a half foot of gravel, machine tamp it, level it and install the box pad.
- After installing the box pad, backfill with loose material and use your foot to tamp the material around it.
- 15" or 24" high models provide extra cable training in case of an elbow failure. Just cut off the damaged piece and use the extra slack to install the new elbow.

SKU	Dimensions	Box Pad Opening	Anchor Brackets	Connectors
CBP-37-43-15A-MP-MG-22x24	37" x 43" x 15"	22" x 24"	No	No
